Summary

A canon event of my life was malware attack.

That 2019 led me towards the field of Computer Science. In high school I completed my computer science and also the prior knowledge of computer basics.

As in 2023 I choose Computer Science in my bachelors degree and persuade my two semester with great success in

-C++ Programming

-Problem Solving

-Logic Building

-Communication skills

In Summer 2024 I learned more about the CyberSecurity field and gained basic knowledge with the help of Google Cybersecurity certificate.

Throughout those years my knowledge in computer, technology and security related fields has increased.
